

Metso:Outotec

O-Series wear parts

Keep your
crusher running

Excellent value in standard crusher wear parts

When you need crusher wear parts right away, Metso Outotec O-Series is there for you. We provide affordable standard parts from the stock — quickly and flexibly. With these reliable and fit-for-purpose wear parts, your work becomes more productive and operations more economical.

Cost efficiency, safe working conditions and preventing unplanned downtime provide daily challenges in this industry. By having reliable and cost-effective parts at hand, customers are better equipped to maintain a sustainable crusher economy.

Available quickly and flexibly

Affordable and reliable wear parts

Crusher wears for your needs

Safety is at the top of our priorities

Worldwide availability and support

Affordable crusher wear parts from one source

The O-Series crusher wear parts provide a perfect balance between performance, affordability and reliability to keep you in control of your operation. The portfolio includes both working and protective wears - meaning you get your crusher wear parts from one reliable source.

mogroup.com/o-series

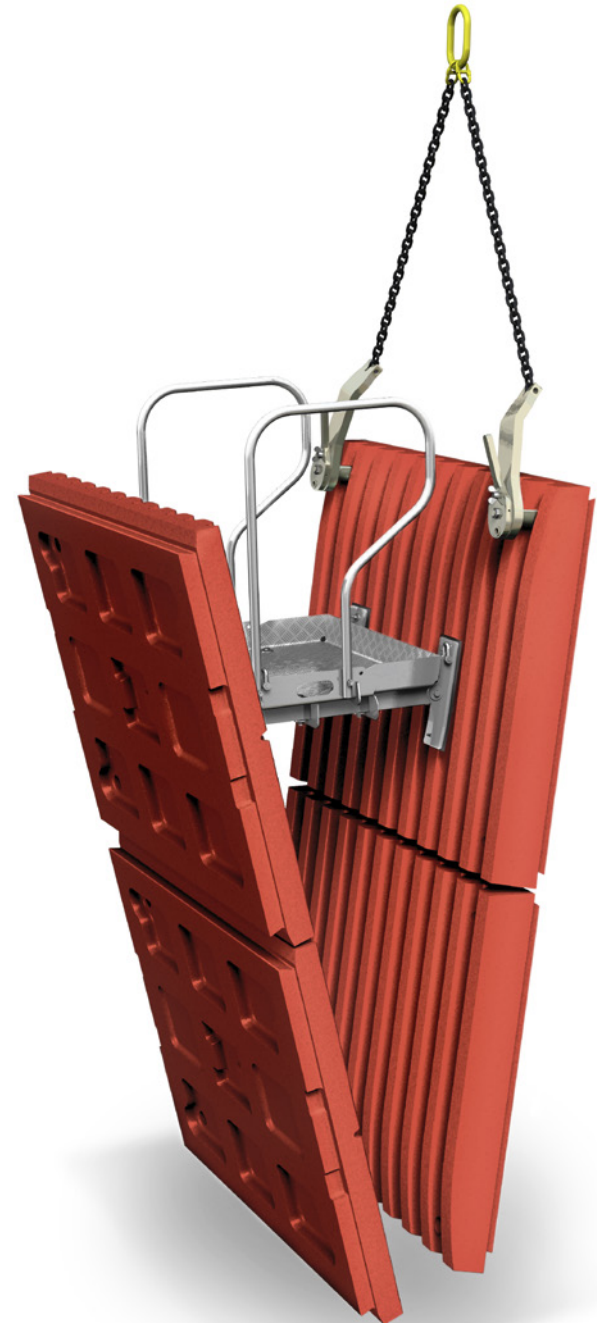

Designed to perform when and where you need them

To stay ahead of the competition, your equipment must run efficiently and without interruptions. We have designed the O-Series wears to perfectly match with your Nordberg® C-Series, HP-Series, GP-Series and Symons™ crushers. Meant for standard applications, they have secure fit and function, with no over-engineering.

Getting the parts you need on time is essential to avoid costly downtime. With our strategically located distribution centers and our local distribution network we can ensure that wear parts are available when you need them.

Improve the safety of your staff

It is crucial to use the appropriate lifting tool for a specific wear part during servicing. Metso Outotec's lifting tools are purpose-designed for our crusher wears. With these tools, you can carry out installations quicker and safer, and reduce the potential safety risks to your staff.

O-Series wear parts

Why choose O-Series wear parts?

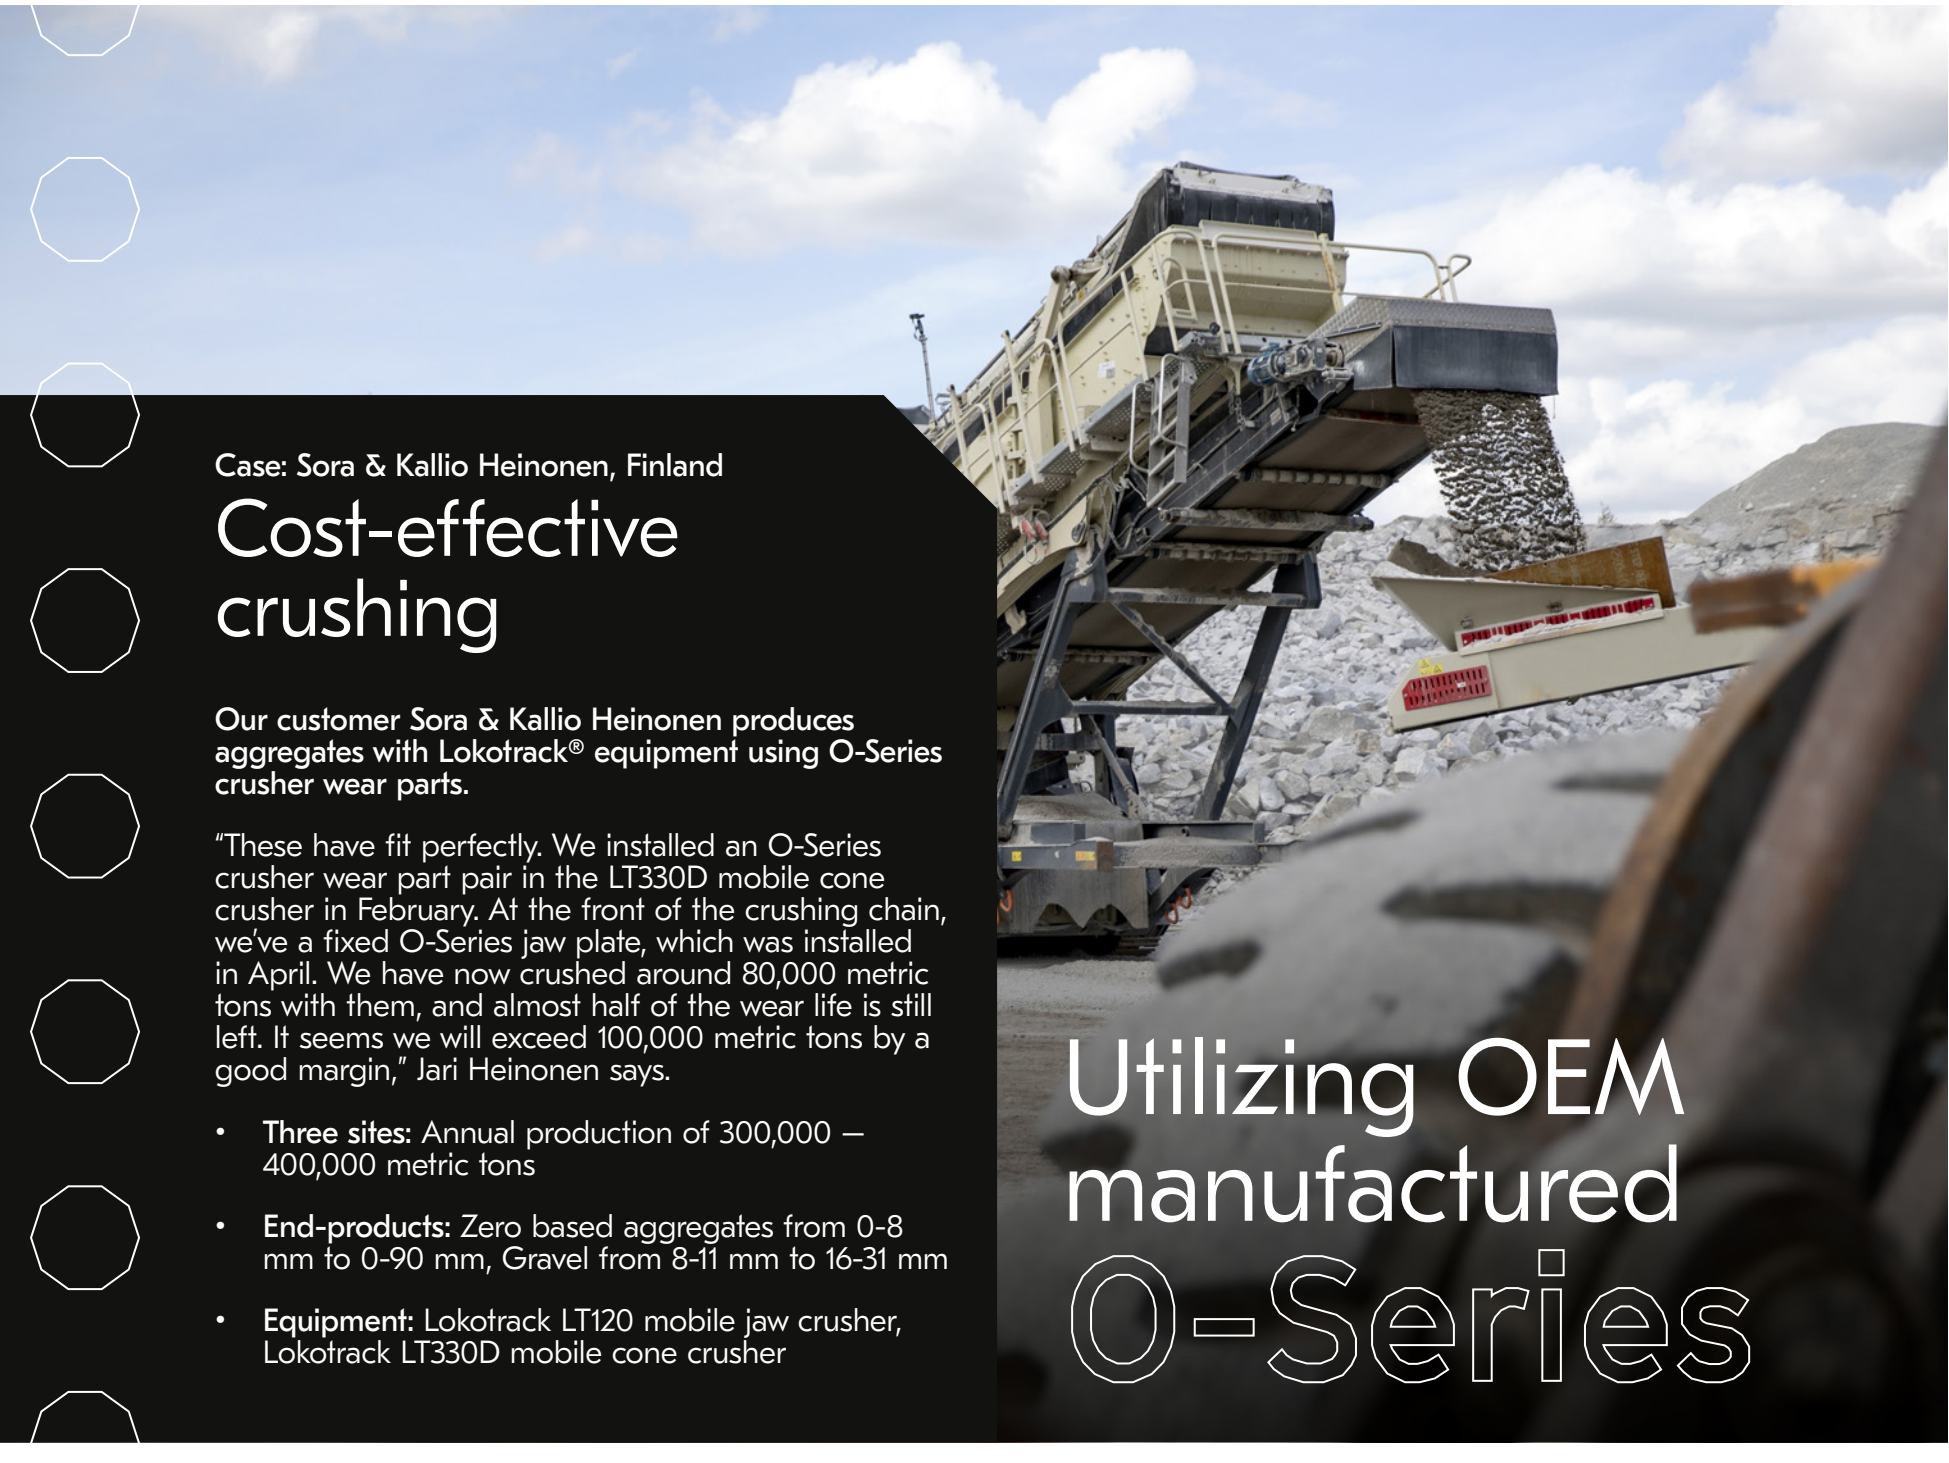

- Ready to use affordable package solutions for your crushers
- OEM quality
- Provides carefree operations
- Prevents unplanned downtime
- Secured fit & functions, no over-engineering
- Easy to buy and easy to stock
- Smart full container load deliveries
- Ensures safe working conditions with special lifting tools
- Safe replacement of mantle, bowl liner, feed cone, arm guard, countershaft guard and hoppers

We expand the O-Series wear range constantly.

Case: Sora & Kallio Heinonen, Finland

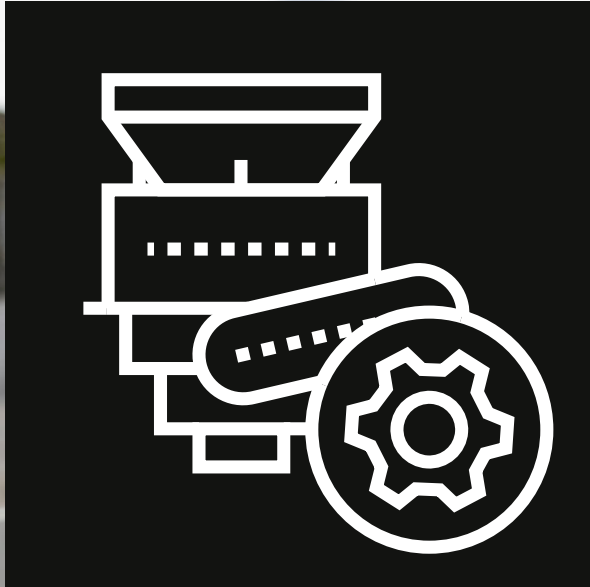

Cost-effective crushing

Our customer Sora & Kallio Heinonen produces aggregates with Lokotrack® equipment using O-Series crusher wear parts.

"These have fit perfectly. We installed an O-Series crusher wear part pair in the LT330D mobile cone crusher in February. At the front of the crushing chain, we've a fixed O-Series jaw plate, which was installed in April. We have now crushed around 80,000 metric tons with them, and almost half of the wear life is still left. It seems we will exceed 100,000 metric tons by a good margin," Jari Heinonen says.

- **Three sites:** Annual production of 300,000 – 400,000 metric tons
- **End-products:** Zero based aggregates from 0-8 mm to 0-90 mm, Gravel from 8-11 mm to 16-31 mm
- **Equipment:** Lokotrack LT120 mobile jaw crusher, Lokotrack LT330D mobile cone crusher

Utilizing OEM
manufactured
O-Series

"Money is always a consideration. We were looking for a lower price without compromising on durability. In the original parts, we were looking for good compatibility in particular, because we've had some problems with parts from other manufacturers."

Jari Heinonen, Sora & Kallio Heinonen
